

////// LITE-CHECK AUTOMATED TRAILER & TRACTOR TESTERS

PRODUCT RELEASE

DATE: September 10, 2009

RE: Introducing the new LITE-CHECK DETECTOR 902, a high-performance, precision tester for trailer lights and air brake systems.

LITE-CHECK LLC is now offering the new DETECTOR 902 test instrument for trailer lights and air brake systems. The DETECTOR is very simple to operate using either the front panel switches or the full function remote control.

One pass around the trailer with the remote allows the technician to turn on any light circuit or perform a full brake operation with air test while at the axle. The software identifies electrical faults by displaying the conditions on a digital display and sounding alarms unique to each type of fault.

The DETECTOR is another addition to the LITE-CHECK family of vehicle testers priced to meet your needs.

Contact LITE-CHECK at 1-800-343-8579 or 1-509-535-7512.
